Video Relay Services (VRS) is wonderful to use. I want to see it become an important real-time communication service. The VRS is for me closer to functional equivalency than other telecommunications services.

I hate to see that our communication throug VRS is being turned off, being cut off. I work as a dorm director at Missouri School for the Deaf, and I have seen student using VRS, only the best commuication method to communicate with their parents. I hate to see they are being cut off. Thanks...
